# Letter of Explanation Change Order No. 1

## Master and Control Lift Station Improvements

Apex No. 11.106.0092: Phase I City of Minot No. 3580

<u>Item No. 1 – Control Lift Station Wall Repair:</u> After bidding of the project, a strong rain storm occurred and it was discovered that the north masonry wall at Control Lift Station leaked significantly. This is not acceptable, as the new electrical gear, variable frequency drives, and supervisory control are to be located along this wall. This item includes the repair of this wall as detailed in the attached PCO#1. Total Additional Cost of this Item: \$27,767.00. This item also requires a two week extension to the completion dates.

Item No. 2 – Additional Concrete and Conduit Relocation at Control Lift Station: The City wished to add some additional concrete around the generator as well as at the north double doors of Control Lift Station. The City also wished to change the location of the generator after some conduit was already in place. This item adds the additional concrete and provides for the relocation of the conduit as detailed in the attached PCO#2. Total Additional Cost of this Item: \$10,637.00.

<u>Item No. 3 – Replace Additional Piping at Master Lift Station:</u> An existing pipe existing Master Lift Station to the west was in poor condition and several sinkholes had developed along its alignment. This piping was not originally planned for replacement. This item replaces this piping with new PVC piping as detailed in the attached PCO #3. Total Additional Cost of this Item: \$68,422.00.

<u>Item No. 4 – Structural Changes at Master Lift Station Influent Chamber:</u> Contractor requested a change at Master Lift Station that would leave a portion of the influent chamber in place below grade. The plans called for complete removal and below grade concrete wing walls. This item provides for a credit for not having to do this work. Total Reduction in Cost of this Item: \$2,000.00.

<u>Item No. 5 – Bypass Piping Changes:</u> The plans called for the bypass piping to use several ductile iron bends along its alignment. The Contractor proposed using field bends with the piping. This item provides for a credit for the elimination of those ductile iron bends. Total Reduction in Cost of this Item: \$7,000.00.

<u>Item No. 6 – Buried Plug Valve Change:</u> The Contractor requested to use a different manufacturer for the buried plug valves. This item provides for a credit for this change. Total Reduction in Cost of this Item: \$1,000.00.

<u>Item No. 7 – Influent Piping Change:</u> The Contractor requested to use 48" PVC PS46 piping on the influent pipe in lieu of the 48" PVC PS115 pipe called for on the plans. This item provides for a credit for this change. Total Reduction in Cost of this Item: \$897.75.

<u>Item No. 8 – Connection of Existing PCCP to New DIP Piping:</u> The Contractor requested to use a different connection method when connecting the existing Precast Concrete Cylinder Pipe to the new Ductile Iron Pipe. This item provides for a credit for this change. Total Reduction in Cost of this Item: \$1,000.00.

Job ##: Proposal Request #1

Address:

Job Name: N. Minot Sanitary Sewer Imp.

Job Locations: Minot, ND

C, S, Z:

Division 4: Masonry – As Per Plan & Spees

Base Bid:

\$7,545.00

Exclude: Heat/Shelter/Steel/Rebar/

Ice & Water Shield / 2" Insulation

Include: Unfaced Batt Insulation in Blk Cavity

We hereby submit specifications and estimates for:

Base Bid:

Seventy Five Hundred Forty Five Dollars and No/100\*\*

We Propose hereby to furnish material and labor - complete in accordance with above specification, for the sum: (\$7,545.00)

Payment to be made as follows: Progress payments
All Progress Payments over 30 days are subject to 1.75 % Interest per month.
All material is guaranteed to be specified, However, we hereby disclaim
any warranties or guarantee with regard to coloration or discoloration of
colored block or colored mortar All work to be completed in a
workman-like manner according to standard practices. Any alteration or
deviation from above specifications involving extra costs will be executed
only upon written orders, and will become an extra charge over and above
the estimate. All agreements contingent upon strikes, accidents or delays
beyond our control. Owner to sarry fire, tornado and other necessary
insurance. Our workers are fully covered by Worker-s Compensation Insurance.

Re: N. Minot Master Lift Change Order Request

Larry,

To supply and install the metal wall panels would cost:

Materiai:\$1,600.00 Labor:\$1,400.00 Totai:\$3,000.00

This is based on using an Omega VR classic panel from Firestone in standard color. Thanks

Brian

January 8th, 2014

To: John T. Jones Construction Company

Subject: North Minot Sanitary Sewer Improvements

City of Minot, ND

We are pleased to quote the following work for the above referenced project.

Description	Unit	Quantity	Unit Price	Amount
Asphalt Patching	SY	46	\$63.50	\$2,921.00

I Telei	I \$2.921_00
i rviai	1 32.321.NU

#### Notes:

- 1. Prime contractor shall pay for the actual, measured, in-place quantities at time of construction.
- Engineering Fees, Surveying, Testing, Bond, Traffic Control, and Line Stripping is not included in price 2.
- Work to be done at the same time as the other asphalt paving for the project.
- 4. Asphalt Patching Price assumes prime contractor to remove existing pavement followed by placing and compacting an aggregate base to match surrounding pavement. Bechtold Paving, Inc. will then remove the aggregate base prior to paving.

  Aggregate base shall be to specified density before Bechtold Paving begins work.
- Saw cutting is not included in price.
- If poor subgrade conditions are encountered, a method of repair and cost will be negotiated with the prime contractor.
- 8. Price is good for 30 days from the date above.

Thank You,

Seth Faaiuaso, Estimator Bechtold Paving, Inc.
